Methodology

The "notes on the reclassified financial statements" contained in the periodic financial reports of the Group may be consulted for a fuller comprehension of the rules followed in preparing the reclassified financial statements.

Methodology

- First set of results since the acquisition of *Nuova Carichiati*, *Nuova Banca Etruria*, *Nuova Banca Marche* (the **“Three Banks acquired”** on 10th May 2017), whose economic results are consolidated with effect from 1st April 2017. In the present document, data are provided with a breakdown that takes into consideration the previous UBI Banca stand alone perimeter and the Three Banks acquired as an aggregate

Economic figures for the new perimeter include only the 2Q17 data of the Three Banks acquired. Balance sheet figures as at 30 June 2017 are compared with figures as at 31 December 2016, shown as the aggregate of UBI Banca stand alone and Three Banks acquired.

- The results for the first half of 2017 include the impact of the **allocation of badwill*** which amounted to €995 million as at 31st March 2017.

That allocation, which results from the restatement at fair value of the assets and liabilities acquired as at the first consolidation date, led to the write-down mainly of non-performing loans, through the increase in provisions by €560 million gross (€375.3 million net of deferred tax assets), while the value of medium to long-term performing loans was in line with the stated value. Much smaller write-downs were recognised on medium to long-term funding, on software and on contracts relating to real estate property funds, while slightly positive values were found for assets under management.

*Following that allocation, the quota remaining relating to the “bargain purchase” recognised through profit and loss in the second quarter of the year came to **€612.9 million**.*

*The adjustments carried out on balance sheet items following the purchase price allocation process have already given rise in the second quarter to both **positive and negative reversals for a net amount of +€13.8 million**.*

* IFRS 3 (R) allows final allocation of badwill to be carried out within 12 months of the acquisition

- The performance of NII in 2H2017 will benefit from recognition in 4Q of a one-off benefit as part of the TLTROII programme, in addition to positive performance by volumes of lending and the progressive reduction in the cost of funding from customers for the 3 Acquired Banks
- Net fee and commission income are expected to continue to benefit in 2H2017 from the process to change the mix of total funding in favour of Assets under Management
- Careful management of costs will continue as result, amongst other things, of planned redundancies for approximately 700 staff, over half of which in 2017, on the basis of the Trade Union Agreement signed in July
- The trend for the reduction in overall loan losses for UBI and the 3 Acquired Banks compared with 2016 is forecast to continue
- Finally, the plan to integrate the 3 Acquired Banks on schedule and to budget in terms of the forecast integration costs is confirmed.
